

Sagehen Use Requirements & Pre-conditions...

In applying for access to Sagehen facilities, all guests agree to abide by the rules outlined in the Sagehen Visitor Manual. In addition:

Application Procedure

Visitors are asked to use our on-line registration system & calendar to apply for access to the facility & to describe their intended use (see web-site). Applicants can use the system to request specific housing & classroom space; every effort will be made to accommodate these requests within the limits of congruent station use. All reservations must be approved in advance by the Station Manager.

Waiver of Liability

Non-UC visitors wishing to use the field station must submit a signed "Waiver of Liability, Assumption of Risk & Indemnity Agreement" form prior to or upon arrival (available for download from our home page).

Visitors must also listen to an orientation talk upon arrival & sign an agreement to adhere to station rules (see the "Station Rules" section of the manual for more information) & acknowledge that they have reviewed & understand the safety-related information (see the "Fire, Emergency & Medical Information", "Vector-borne Disease" & "Living with Wild Animals") contained both in the visitor manual & on our "info" web-page.

Failure to comply or breach of agreement will result in immediate expulsion from the facility.

Permits

Station visitors are required to research & obtain any applicable permits prior to beginning work. See the "Research & Collection Permits" section of the manual for more information.

Fees

Fees will be assessed for your stay at Sagehen. All guest fees go directly toward operation of the Station. For current rates, see our web-site.

Safety

Visitors should be familiar with the safety information available on our "info" web-page & in the manual.

Annual Summary

Researchers agree to provide an annual research summary of work undertaken while at Sagehen. Please provide the following by June 30 of each year (the summary and list of publications will be published in the NRS Annual Report and on the NRS system-wide web page):

- A brief summary of your research accomplishments, including the title of the project, a list of all participants on the project with their affiliations.
- A list of your current publications based on research done on the reserve (complete references).

- Two copies of all published materials, including conference proceedings, abstracts, and technical reports (one bound copy only of theses and dissertations), resulting from your research. Please acknowledge the UNIVERSITY OF CALIFORNIA NATURAL RESERVE SYSTEM, UCB SAGEHEN CREEK FIELD STATION in any publication resulting from use of the reserve.
- Source of funding for your project, dates of funding, and the funding amount.

University of California Natural Reserve System Station Use Requirements...

In 2004, Sagehen Creek Field Station achieved the long-time goal of joining the UC Natural Reserve System. All guests of the station, regardless of affiliation, are required to agree to & sign off on NRS policies as a precondition of their use of the field station. For more information about the NRS & its policies, see <http://nrs.ucop.edu/>

NRS Reserve Use Guidelines

The Reserve Use Guidelines have standardized these founding principles and values of the NRS. Under the guidelines:

Activities that will or are highly likely to irrevocably harm the natural values, ecosystem functions and native biodiversity of the reserve, or preclude its possible future use for University-level research or instruction, will not be allowed.¹⁷

In evaluating applications for reserve use, reserve managers may consider, among other things, the impacts on natural systems and long-term use. Evaluation criteria include:

(a) Impacts on Natural Systems. Potential positive and negative impacts on natural systems (e.g., significant new research, extensive collections, significant habitat alterations, introductions of species or genes);

(b) Impacts on Present or Long-term Use. Potential positive and negative impacts on present or future long-term use of the reserve for research or instructional purposes...¹⁸

Consistent with Ken Norris' early recommendations, the use guidelines allow for zoning in the reserves. Reserve management plans may zone certain areas that contain fragile resources "off-limits" to most users. Furthermore, reserve managers are given the latitude to direct highly manipulative research to field stations outside the NRS:

For highly manipulative research that may irrevocably harm the natural values of the reserve or preclude its future use for University-level research or instruction, the prospective researcher may be directed to areas outside the reserve if such areas are available, or the application may be denied.¹⁹

NRS Acknowledgment

To ensure that the University of California and the Natural Reserve System are properly acknowledged, the University-wide NRS Advisory Committee approved at its May 2002 meeting the following acknowledgments to be included in all publications, theses, reports, etc. that benefit from use of NRS sites or research support.

Form for Acknowledgments in Publications or Reports of Work Performed at UC NRS Sites or Using Such Sites as a Base

"This work was performed (in part) at the University of California Natural Reserve System (name of site) Reserve."

Form for Acknowledgments in Publications or Reports of Work Supported by System-wide UC Natural Reserve System:

"This work was supported by a Mildred E. Mathias Graduate Student Research Grant from the University of California Natural Reserve System.

or (as appropriate)

This work was supported by a grant from the University of California Natural Reserve System."

Submission of Bibliographic Data

Whenever you work on an NRS reserve, you must provide the NRS Information Management System (<http://www.ucnrs.org>) with the full bibliographic citation - whether you did a report, thesis, book, research paper, conference proceedings, or other publication. You must do this within six months of publication. Please include the NRS reserve name as one of your "key words" in every manuscript you prepare. You must provide paper copies of all publications or an electronic version (PDF file) to the manager of your reserve. Failure to deposit bibliographic information as requested may lead to automatic denial of future Use Applications.

Submission of Metadata

Whenever you create a dataset from work you do at NRS sites, you must fill out a form that describes your dataset, including:

- title of the dataset
- your name
- your mailing address
- your e-mail address
- an abstract (500 words maximum)
- keywords, and
- the temporal/spatial coverage of your data.

Please enter these metadata online at the NRS website: <http://www.ucnrs.org>. If your work involves ongoing, multi-year studies, please submit your metadata database entry at the end of the second year of your investigations and, once again, when you complete the study. Failure to deposit Metadata information as requested may lead to automatic denial of future Use Applications.

Non-native Genotypes on NRS Reserves

Research that involves the introduction or translocation of a plant, animal, or microorganism on an NRS reserve can endanger both the native populations of the same species and the entire community in which the species lives. Since 2001, a system-wide process has been in place to evaluate proposed introductions and translocations of exotic genotypes and to provide guidance to prevent the problems associated with them.

Food & Supplies...

We provide cleaning supplies, trash bags, toilet paper & everything you need to prepare & serve meals except for food & someone to cook it. You need to supply everything else: toiletries, sun cream, office supplies, computer disks, laundry soap, charcoal, etc. There is virtually always a selection of spices including salt & pepper in the "Free-For-All" bin.

Soap

Bars of soap & powdered laundry detergent impose serious cleaning penalties on all station users & are not allowed. Liquid soaps only!

Food

There are restaurants & large grocery stores in Truckee, 10 miles away. Reno—45 minutes away on I-80--has additional options like ethnic groceries & large warehouse stores. On-site catering services can be arranged at Sagehen with sufficient notice; discuss your needs with the Station Managers.

Mice, raccoons, bears & other animals rapidly become a serious problem at Sagehen if we do not maintain strict etiquette regarding cleanliness, trash discipline, food storage, preparation & consumption. Guests are expected to do their part to keep the facilities sparkling clean. If we are forced to hire a cleaning service, then your fees will rise dramatically.

We have refrigerator space and mouse-proof storage boxes for your weekly groceries; no massive storage requests, please! All your food must fit into your assigned box & assigned refrigerator space; we need the empty spaces to be available when new groups arrive—**do not spread out!** Food left outside your assigned area will be systematically thrown away without notice.

Food storage, preparation & consumption at Sagehen take place in communal areas. You will respect other guests' property. **Taking food that does not belong to you is obnoxiously infantile & may result in expulsion from the facilities.**

Food storage & preparation are allowed ONLY in the kitchen. Food consumption is allowed in the dining room, on the deck & picnic tables, NEVER in the library, West Wing video area or cabins (Garage Apartment & Johnson Cabin excepted). You are well-advised to never leave any form of food inside your personal vehicle (including coffee supplies); mice are impossible to keep out if you do.

Do not abandon your leftovers when leaving! Take them with you or throw them out. Only **unopened, non-perishable** food items may be left in the "Free-For-All" bin. Opened spices are allowed. Absolutely no food may be left as "donated" in the refrigerators or freezer. No opened food packages or prepared food may be left anywhere.

Processing & storing research samples or collections is not permitted in food preparation & consumption areas!

Special Kitchen Equipment...

Hood & Ventilation System

The ventilation hood over the stove has heated & cooled make-up air. There is a switch box to the right. The ventilation hood filters smoke & grease out of cooking fumes before it can settle on walls & surfaces, reducing guest cleaning responsibilities. Unless you are just heating water, ***the hood should be used every time something is cooking.***

Fire Extinguishers

The hood system includes an automatic fire-suppression system triggered by fusible links that melt in the event of a hot fire. There is also a manual activation pull. The fire suppression system is very powerful & extremely over-sized for small fires. It is also a huge mess to clean up & very expensive to recharge. If possible, first use either of the two portable, silver fire extinguishers hanging near the kitchen doors.

Fire extinguishers in the kitchen are filled with a different suppressant than the small red extinguishers found elsewhere in the station buildings & vehicles. The two suppressants are not compatible. Use the silver kitchen extinguishers for kitchen fires, the red extinguishers for fires outside the kitchen.

Espresso Machine

The water reservoir in the back of the espresso machine must be refilled before every use!

The switches are labeled. Turn the machine on with the "power" switch; the pressure pump will come on loudly to prime the tank. If the pump doesn't shut off, the reservoir has run dry. Refill it & let it run until it primes. This shortens the life of the machine: ***don't let the reservoir run dry!***

Fill the dispenser with espresso coffee & pack it down. Twist to engage the dispenser. When the gauge indicates the machine is hot, use the "coffee" switch to dispense the espresso & turn it off when you have enough.

If liquid will not come out of the dispenser when you throw the switch, your grind is too fine. Clean it out & use a coarser grind.

Trash...

Mice, raccoons, bears & other animals rapidly become a serious problem at Sagehen if we do not maintain strict etiquette regarding cleanliness & trash discipline. Please help keep Sagehen clean by picking up any trash lying around the camps.

Trash cans

Trash cans should be lined with bags & covered with tight fitting lids. When full or just prior to leaving the station, bags should be tied & placed in the green dumpster (the tan dumpster is a winter holding location & should not be used in the summer).

There is no trash service during the winter months. Winter guests should plan on packing out their trash during the period of road closure from roughly mid-November to mid-April.

Recycling

The Truckee land-fill is an impressive operation where trash is sorted for various recycling & disposal options. If you would like to separate out recyclables, this makes their job easier, but it is not mandatory. Any bags of recyclable materials go into the same green dumpster as the trash.

Bags of cans or other recycling may not be stored anywhere on the premises. This trash causes problems with mice & insects, as well as making a smelly, sticky mess.

Ashes

If you use the charcoal barbecues or a fireplace, you must deal with the ashes after every use! There are absolutely no campfires allowed at Sagehen!

1. Find the designated metal ash can;
2. Empty the cold ashes from it into the green dumpster;
3. Dump your hot ashes into the metal ash can;
4. Leave the can near the dumpster & away from flammables for the next user.

Smoking at Sagehen...

Sagehen structures are largely constructed of wood & are as much as 50 years old. The surrounding forest is radically overgrown with significant fuel accumulations. We are actively working to address this forest health issue.

Needless to say, we are extremely concerned about ignition sources that could easily endanger lives & lead to destruction of the facilities & surrounding forest by wildfire. Additionally, as a California state facility, we are bound by regulations on smoking in public places.

Smoking is absolutely forbidden in any of Sagehen's buildings at any time. Guests will confine their smoking to the large, vegetation-free "parking" area in the middle of the Lower Camp in front of the group kitchen.

Smokers must treat their butts as trash—throw them into a trash bin if they are cold, into the designated "Ashes" can if they are hot. ***Do not leave cigarette butts on the ground nor throw them out of vehicle windows while driving in the basin!***

Campfires & Barbecues...

Sagehen structures are largely constructed of wood & are as much as 50 years old. The surrounding forest is radically overgrown with significant fuel accumulations. We are actively working to address this forest health issue.

Needless to say, we are extremely concerned about ignition sources that could easily endanger lives & lead to destruction of the facilities & surrounding forest by wildfire.

Campfires & other open flames are not allowed at any time!

Barbecues are provided for cooking. Guests may use only charcoal & agree to clean grills & surrounding area after every use to prevent animal problems (wire-brush & burn grill off, sweep patio, dispose of ashes).

To dispose of ashes:

1. Find the designated metal ash can;
2. Empty the cold ashes from it into the green dumpster;
3. Dump your hot ashes into the metal ash can;
4. Leave the can near the dumpster & away from flammables for the next user.

Guest Cleaning Duties...

In order to keep cost to guests as low as possible, there is no cleaning service at Sagehen. Therefore, as a condition of the stay, all guests agree to maintain the station facilities to a high degree of cleanliness. ***If you enter a space at Sagehen, you have a duty to help keep it clean!*** Always leave things a little cleaner than you found them to help account for road dust, spiders & other forms of entropy that deteriorate conditions over time irrespective of use.

We provide a sign-up sheet to help guests organize cleaning schedules among themselves. As long as things are staying adequately clean, the Station Managers will not get involved. If cleanliness slips, we will be forced to make assignments.

Sagehen provides cleaning supplies. If you have trouble finding them, let us know. Surfaces should be wiped with a solution of ***1 part bleach to 9 parts water***. Bars of soap & powdered laundry detergent impose serious cleaning penalties on all station users & are not allowed: liquid soaps only! ***Vacuum cleaners must be emptied after every use!***

You are responsible for cleaning & replacing any tools, supplies or equipment that you borrow from Sagehen. ***Researchers are expected to remove all markers, apparatus or other evidence of their field experiments when work is complete, even if that means making a special trip to the station!***

Kitchen

- Sweep, dust & mop; wipe surfaces & walls. Remember to do small appliances, under tables, stove, refrigerators, etc.
- Clean inside food bins, refrigerators & freezer, windows
- Clean sinks, floor sinks, stove, oven, microwaves, ventilation hood, etc.
- Empty trash; pick up any trash in or around building.
- Wash kitchen towels & hang on laundry line to dry. Since towels will be drying on the line when groups leave, if you find towels on the line when you arrive, you should put them away—someone else will do the same for you when you leave.

Bath houses

- Sweep, dust & mop; wipe surfaces & walls
- Clean showers, toilets, sinks, washing machines, windows.
- Empty trash; pick up any trash in or around buildings.

Cabins, Library, Labs, Classrooms, Living Room, Fish House, Tool Shed, etc.

- Sweep, dust & mop, wipe surfaces & walls, clean windows & computer screens.
- Empty trash; pick up any trash in or around buildings.
- Replace loose items. Refold & repack blankets.
- Empty ashes out of fireplace & restock firewood & kindling where applicable.

Guest Phone Use...

Unfortunately, cell phones do not work in the basin, but you can get reception right up to our front gate about 1.5 miles from the Lower Camp.

Sagehen provides a phone line exclusively for the use of our guests. The number is (530) 582-5625. There is a long-distance block on the line, so you will need to use a calling or credit card for toll calls.

The answering machine on the breezeway desk is for visitor use. The Station Managers do not maintain this machine; we suggest that you write any messages (that are not for you, of course) on the white board before deleting them from the machine.

The Station's business phone is not for guests; it may be given out for extreme emergency use only. We absolutely will not take messages nor chase down guests for calls to the business number.

The station fax number is (530) 582-4031. If you need to send a fax, ask the staff to help you.

Please limit your personal phone time to 10 minutes for both incoming and outgoing calls. This allows for more folks to use the phone and allows some time for incoming messages as well. If you are waiting to make a call and someone is exceeding their time allotment, you are strongly encouraged to ask them to end their call.

Remember, there is a second line that can be used for outgoing calls. It is located in the cradle in the guest office area. This phone is for outgoing calls only and is not to be used for incoming calls. The 10 minute time limit applies to this phone as well.

Computer Use at Sagehen...

The Sagehen Library contains a number of networked PCs & Macs for guest use. Some of these machines have Microsoft Office & other software; some have CD burners. The network offers access to the internet, to GIS resources & to printers & plotters. The current guest password is posted on the breezeway white board.

Guests can access the Sagehen network with their own laptops in two ways:

1. By using the loose Ethernet cables in the visitor office & library;
2. Via our 802.11g wireless network if their computer has a compatible wireless NIC card (802.11b or g).

Printers

There is a 10¢ per page fee for the use of Sagehen printers. If you need to make large numbers of copies, please make prior arrangements with the Station Manager.

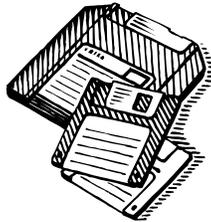

Prohibited uses

Sagehen computer assets are made available to assist with research & education efforts. They are not for entertainment purposes.

The 3 black Dell PCs are set up for GIS use. ***These work machines are not for internet surfing or e-mail. Ever.*** Heavy internet access creates a need for substantial computer maintenance on these specialized machines that we do not have the resources to support.

Illegal file-sharing & all music & movie downloads are not permitted. ***All software downloads & alterations to station computer or network settings are strictly forbidden & will result in immediate expulsion from the facility!*** If you need access to particular software for your work, speak to the Station Managers.

Younger students may not use the machines except under direct instructor supervision for specific educational projects. Undirected surfing & other computer use by minors is not allowed.

Mail at Sagehen...

Incoming mail

Sagehen has a P.O. box in Truckee. We can also receive Fed-ex & UPS deliveries at our physical address. We always use both addresses to avoid delivery problems with the random contract drivers used for rural area deliveries:

UCB Sagehen Creek Field Station
P.O. Box 939/11616 Sagehen Road
Truckee, CA 96160

You are welcome to use this address for your incoming mail, but there is a catch: ***since this is the station's address, the Post Office will not allow you to simply fill out a "change of address card" at the end of the season & get mail-forwarding***; you must inform everyone sending you mail of your new address. We are still receiving piles of mail for people who stayed at the station many years ago—***we cannot forward your mail to you after you leave*** (if you are expecting a delivery that has not arrived at the time of your departure, we will forward it if you speak to us first).

The Station Manager checks the mail on most days. If there is guest mail, he will put it in the "incoming" mail rack inside the breezeway. If you have a package, he will try to find you personally to deliver it—if this fails, he will leave it on the breezeway desk.

Outgoing Mail

If you would like the Station Manager to post your mail, attach appropriate postage, then leave it in the "outgoing" mail rack in the breezeway. We will also drop off prepaid Fed-ex packages.

E-mail

We do not operate an e-mail server. If you will be using Sagehen computers, we recommend an internet-based mail service like Excite or CalMail. If you have your own computer, you can continue using your current mail server settings via our network internet access. Guests may not configure incoming & outgoing mail service on Sagehen machines.

Parking & Driving at Sagehen...

Sagehen's facilities lie 2 miles off of highway-89 on a graded dirt road that is generally passable to low-clearance vehicles during the spring, summer & fall. The Sagehen access road is narrow, somewhat rough & frequently used by delivery trucks, pedestrians, skiers, dogs, school groups, researchers, horses & bicycles as well as passenger vehicles. In the winter, our road is snow-packed and impassable to wheeled vehicles. Check our web-site's "What's New" link for current road conditions.

Cars are a major challenge at Sagehen. Guests are expected to help us deal with this challenge by sublimating their desire for high speed station access, exclusive right to the road & convenient parking. Those who will not do so will lose their vehicle-access privileges at Sagehen.

Guests are expected to keep vehicle speed below 15-20 mph at all times for the following reasons:

- To preserve a drivable road surface;
- To reduce road maintenance costs;
- To cut down the dust permeating the camps & buildings;
- To reduce guest cleaning responsibilities; &
- To maximize safety.

Fast or reckless drivers will lose their vehicle access privileges.

We encourage carpooling whenever possible. Parking at Sagehen is challenging, limited & in most cases inconvenient. Mouse infestations of your vehicle are possible.

Large "parking" areas in the middle of the Upper & Lower Camps are for delivery truck turn-around & loading/unloading only, not for parking. Please limit loading & unloading near structures to reduce dust.

We preserve & manage parking space for events & group visits. The Station Manager assigns parking spaces; do not assume that any open space is available to move into! Your parking space will likely not be convenient to your living space, especially if your vehicle is large.

Parked vehicles must be well off the road at all times to allow for fire-truck & other large vehicle access. We will remove vehicles that are interfering with road access, typically without warning.

Mountain bikes are useful at Sagehen for recreation, riding out to the highway or for commuting into town if you are somewhat sturdy; this involves roughly 13 miles each way, either on paved highway (limited shoulders), dirt road & track or a combination. We will assign the available indoor bike storage on a first-come, first-served basis.

Guests of Visitors Policy...

Guests of visitors are welcome at Sagehen ***as long as the Station Manager is notified in advance. Unexpected guests will be asked to leave.***

Since they do not receive the standard Sagehen orientation, it is your responsibility to inform your visitors of the rules of their stay which are outlined in this manual. ***Any breach of visitor expectations by your guest(s) is your responsibility & may result in your own loss of privileges.***

Guests of visitors are expected to fulfill all the duties of regular station guests, including cleaning & payment of applicable fees.

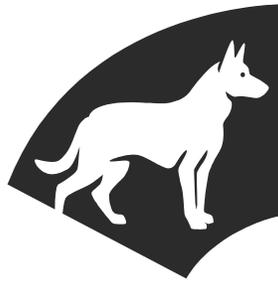

Sagehen Pet Policy...

No pets & especially, please, **NO DOGS, NO EXCEPTIONS, DON'T ASK!** Why not?

- We are a member of the University of California Natural Reserve System (UCNRS). This organization has a non-equivocal policy of no dogs on its reserves;
- Dogs can unintentionally disrupt wildlife & interfere with ongoing data collection & site research & experimentation;
- Dogs present a potential safety hazard & unfair inconvenience to other station visitors;
- There's no such thing as one dog--everybody else who has one will insist on bringing it without further ado if they see yours, even if you try to keep it in the car (which is not fair to the animal).

This is not a case where begging forgiveness is easier than asking permission. If you arrive with a dog, you will be asked to leave immediately. Please don't force us to be firm.

The Station Manager can recommend a great dog-sitting service in Truckee if you need to make local arrangements for your pet.

Invasive Species Spread Prevention...

See "University of California Natural Reserve System Station Use Requirements" for the station policy regarding intentional use of non-native genotypes at Sagehen.

Many macroinvertebrates were typed in Sagehen Creek & its tributaries. We are eager to preserve the integrity of these unique organisms & ecosystems. Anyone entering the stream system is expected to take all necessary precautions to protect this valuable resource.

To avoid unintentional introduction of disastrously invasive & destructive menaces into Sagehen Creek, researchers & workers should observe the following equipment guidelines:

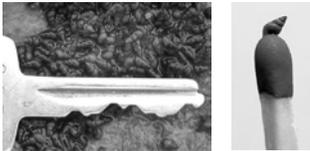

- Dedicate new waders & other equipment to Sagehen Creek projects whenever possible;
- When this is impractical, freeze wet equipment overnight, or
- Dry equipment over several days—equipment must be completely dry, not damp!

New Zealand Mud Snails

New Zealand Mud Snails devour & wipe out macroinvertebrates, destroying the food chain & eliminating fish & the animals which depend on them. The snails & their larvae are tiny & difficult or impossible to spot on gear. Their spread is associated with stream wading.

4/22/2005. The following is an official statement from CDF&G:

"Preliminary results from laboratory tests and field trails demonstrate that solutions of 1,000 PPM copper sulfate, 2,000 PPM benzethonium chloride, or 50% Formula-409® kill New Zealand mud snails on fishing gear within 5 minutes. Fishing gear was completely submerged or put in a dry-sack with the solutions and shaken. The gear was then rinsed in fresh water. The laboratory tests demonstrated that these solutions had minimal effects on the integrity of the fishing gear. The study was funded by CALFED and completed by the California Department of Fish and Game with guidance from several angler organizations and the U.S. Fish and Wildlife Service. Study results are currently undergoing scientific and legal review."

More info: <http://www.flyline.com/environmental/nzms/>

Elodea Canadensis

Elodea is an invasive water weed. It spreads through introduction of bits of the plant to new stream sections. Elodea is present below the Sagehen weir, but not above. Please do not wade from downstream to upstream of the weir without treating equipment.

Sagehen Collection & Research...

Collection Permits

Most collecting is prohibited within the Special Permit Area. Check with the Station Manager for more information.

Other agencies may have additional permitting requirements. Researchers are responsible for seeking out & fulfilling these additional requirements. Copies of any permits must be submitted to Sagehen prior to work beginning.

Animal Use Permits

All projects involving animals must meet UC Berkeley Animal Care & Use requirements:

<http://www.acuc.berkeley.edu/functions.html>

Animal protocol approvals are to be submitted both to the Station Manager and the UC Berkeley Animal Care and Use Committee (ACUC) and approval must be in hand prior to any work beginning!

Other agencies, i.e. US Fish & Wildlife Service, CA Dept. of Fish & Game, etc., may have additional permitting requirements. Researchers are responsible for seeking out & fulfilling these additional requirements. Copies of any additional permits must also be submitted to Sagehen prior to work beginning.

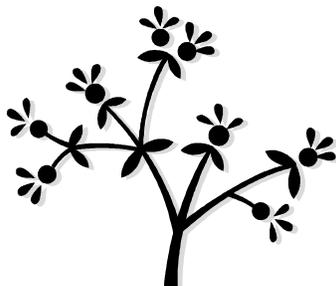

Lab Facilities

Sagehen has a small wet lab, a dry lab with dedicated refrigerator & freezer space & a variety of lab equipment. Please speak to the Station Manager about your needs.

Processing & storing research samples or collections must take place in labs & never in living spaces or food preparation & consumption areas!

Clean-up

You are responsible for cleaning & returning any tools, supplies or equipment that you borrow from Sagehen. ***Researchers are expected to remove all markers, apparatus or other evidence of their field experiments when work is completed, even if that means making a special trip to the station!***

Sagehen Road & Weather Conditions...

Current weather forecasts, highway & access-road conditions can be accessed on the internet via links on our website's "info" page.

Weather data from the East Meadow site, the Carpenter Ridge SNOTEL site & other data-collection sites in the area can be accessed from our "resources" page.

If you like, report unusual weather events to the National Weather Service: (800) 446-1428.

Additional Safety Information & Guidelines...

More information is available from UC Berkeley's Environmental Health & Safety department.

EH&S publications & information: <http://www.ehs.berkeley.edu/pubs/publications.html>

EH&S Fact Sheets: <http://www.ehs.berkeley.edu/pubs/factandhelp.html>

Sagehen Souvenirs...

See Station Managers to purchase souvenirs.

T-Shirts

Sagehen T-shirts are unbleached, organic long-staple cotton from Patagonia's "Beneficial T's" division. Shirts have natural color fabric, green & brown hard-edge graphics including large Sagehen logo & URL on back. "Excellence in research & education since 1951..." tag-line on front.

Available in S, M & L sizes for \$15 each.

Dress Shirts

Patagonia dress shirt with Sagehen logo embroidered over left breast & URL on back. Available in white; size M & L. \$70 each.
